Portfolio | Github

CAREER OBJECTIVE

Motivated web developer with a solid grasp of both frontend and backend fundamentals. I possess practical experience from small, real-world projects and have a passion for continuous learning. I am seeking an entry-level opportunity that will allow me to accelerate my growth by working on actual projects.

TECHNICAL SKILLS

- Languages: HTML,CSS, C,C++, javascript, typescript, SQL, core Java
- Frameworks / Libraries: React.js, Redux, Tailwind CSS, Tanstack Query, Express.js, Node.js
- Databases: MongoDB, MySql, PostgresSQL
- Other: JWT, REST APIs, Git, Github, responsive design

PROJECTS

Employee Management System   Github | Live

- A complete employee management system with CRUD operations, role-based features, and clean UI.
- Features like authentication, role-based access, GPS based attendance management, Leave Management, Salary Management

The Startup Burnout   Github | Live

- A WebSocket-based game where players collaborate as developers to complete tasks and launch a product — while one hidden corporate spy sabotages the team.
- Real-time room and player state synchronization.

Simple Chat App   Github | Live

- A lightweight real-time chat application built to understand WebSockets and live state updates.
